Draft Discussion Paper - comments requested

In September 2001, the Financial Stability Forum Working Group on Deposit Insurance introduced for the first time, inter alia, guidance on measures to promote effective interrelationships among safety net participants. Although the guidance points represented a significant breakthrough in the provision of information on this subject, it was recognized that further work was required to provide for more detailed and comprehensive guidance. The objective of this paper is to make a contribution towards filling this gap. It was prepared by the Sub-Committee on Inter-relationships among Safety Net Participants. The paper and the guidance points included therein benefited to a large extent from a survey questionnaire distributed to Members and other financial safety net participants in June 2004. The paper also draws on relevant reports and other literature available on the subject. The key guidance points are summarized in the last section of the paper under the following three broad categories: (1) the composition, mandates and powers of financial safety nets; (2) co-ordination among safety net participants; and (3) the importance of information sharing. Comments are welcome and should be sent to Winston Carr at: wincarr@cwjamaica.com.
